

Curriculum Vitae for Lars Nelleman.

Medical Doctor & Pharmaceutical executive with 30+ years' experience in developing and commercializing new drugs. 25 years' experience in Asia Pacific.
Core competencies: Drug development, Clinical Research, Medical Affairs, Diabetes, CNS, Asia Pacific.

Civilian status: Married, naturalised Singapore citizen since 2017 (born in Denmark).

Education: Medical Doctor from Copenhagen University 1983.

Clinical Medicine 1983-88:

I held various postgraduate positions at Copenhagen City University Hospitals, mainly within anaesthesiology, cardiology, pulmonary medicine and internal medicine. I also served one year as flight surgeon in the Danish Air Force.

Novo Nordisk HQ 1988-1992:

I held various positions within Medical Affairs and Clinical Research in Head Office. 1990 promoted to Medical Director for clinical development of diabetes projects. Project manager for rapid insulin analogue project, that later led to marketing of NovoRapid.

Novo Nordisk HQ 1992-1995:

Global Medical Director for clinical and medical functions across product division. This included Pharmacovigilance, CQA and Global clinical trials coordination. In this role championed development of mentioned functions to world class standard.

Novo Nordisk Asia Pacific Centre 1995-2002:

Regional Medical Director based in Singapore, with responsibility for Medical Affairs, Regulatory Affairs, and Clinical Development. Established a Clinical Development Centre headquartered in Singapore with clinical operations in all major markets in Asia Pacific. This development centre contributed significantly to Novo Nordisk's global clinical trials, and ensured local development and registration of drugs for China, Korea, Taiwan, India

Lundbeck 2002-2018:

Regional Medical Director for Clinical Development Centre, Asia Pacific. Established a Clinical Development Centre headquartered in Singapore with clinical operations in all major markets in Asia Pacific. This development centre contributed significantly to Lundbecks global clinical trials and ensured local development and registration of drugs for China, Korea, Taiwan, India. In this position also responsible for Medical Affairs, including pharmaceutical marketing compliance.
